

PREETHI K

Role: Software Test Engineer

Mobile: 9789989789

E-mail: preethivairu05@gmail.com

Address: No 40 Labour Colony Palikaranai, Chennai.

Objective

I am looking forward to an opportunity, where I can utilize my experience and skills in contributing effectively to the success of the organization and further improvement of my personal skills.

Academics

- Bachelor of Engineering (Electronics and Communication Engineering), Anand Institute of Higher Technology – 65% (2020)
- MBA (Business Administration), SRM University – 75% (2023)
- HSC (XII), SRV Girls Higher Secondary School – 67% (2016)
- SSLC (X), St. Mary's Girls Higher Secondary School – 87% (2014)

Work Experience

CI Global Technology (February 2023 – July 2025)

Strong experience in understanding client requirements and analyzing products to derive effective testing insights. Proficient in designing, reviewing, and maintaining test cases based on requirement and specification documents. Experienced in performing User Acceptance Testing (UAT), Smoke, Functional, Integration, and Regression Testing across multiple releases. Hands-on experience in maintaining Requirement Traceability Matrix (RTM) to ensure complete test coverage and quality compliance.

XYLIUM GLOBAL SERVICES PVT LTD (July 2025 – Present)

- Performed testing on FinTech web and mobile applications covering case management, verification workflows, reporting, and role-based access control.
- Designed, reviewed, and executed Functional, Integration, Regression, Automation, and UAT test cases based on business and compliance requirements.
- Validated financial workflows, data integrity, and report generation across Admin, Client, Back Office, Quality Check, and Field Agent modules.
- Tested critical functionalities such as report regeneration, pincode management, client configurations, and approval workflows to ensure system compliance.
- Logged and tracked defects using Jira and performed Smoke and Sanity testing to ensure application stability before releases.

Technical Skills

- **Manual Testing:** Agile methodologies, Sanity Testing, Smoke Testing, Regression Testing, Functional Testing, Integration Testing, Performance Testing, Database Testing, API Testing
- **Automation Testing:** Playwright, JavaScript Language, Locators & XPath, Test Case Design and Execution, End-to-End Test Automation
- **Security & Tools:** Basic security testing using Burp Suite, SQL queries for database validation
- **Test Management:** Test Plan Design and Execution, Defect Life Cycle, STLC & SDLC processes

Tools Known

- **Automation Framework:** Playwright Test for automated web testing including functional, regression, and end-to-end workflows
- **Defect Tracking Tools:** JIRA and Azure DevOps for defect logging, tracking, and management throughout the software development lifecycle

Interpersonal Skills

- The skill of doing team work in a team and organized manner
- Focused on doing Analytical & Logical thinking and committed to offering quality work
- Flexible enough to adapt to the new environment
- Highly motivated and eager to learn new things

Projects

Yellowstone

Worked on an asset and employee management system including POS, inventory, and hotel management modules. Focused on fixed assets setup, resource linking, work orders, and employee scheduling with multilingual testing. Responsible for test case creation and execution, manual testing on web, and reporting defects using Azure DevOps.

RubiCube

Tested RubiCube, an AI-driven analytics platform that integrates multiple data sources to deliver real-time dashboards, predictive insights, and key influencer analysis. Validated end-to-end data workflows including ETL processes, data warehouse integration, and analytics modules. Performed functional, integration, and data validation testing for features like anomaly detection and forecasting.

Metaproteins

Tested an e-commerce platform for fresh meat delivery, ensuring smooth browsing, ordering, and tracking experiences. Involved in test plan design and execution, manual testing on web, Android, iOS, and tablet, and defect reporting via JIRA.

Statfin

Worked on the CPV and RCU module of a FinTech application used for monitoring and reviewing case details across client and internal user roles. Responsible for validating the case lifecycle flow, including data accuracy, role-based access, case details visibility, and report generation.

PayIn

FinTech web application for managing payment collections, dashboard analytics, and transaction insights. Involved in validating key financial workflows including payment status, transaction summaries, dashboard widgets, and role-based access for Admin and internal users.

Apex

Worked on the Apex Seekers EdTech portal including institute onboarding and education loan processing via RUGR EMI. Conducted end-to-end validation of workflows and ensured data accuracy across Admin, Customer, and Institute modules.

Declaration

I hereby declare that the information is true to the best of my knowledge.
